Subject: 2013 Update of a Pavement Management Program – Final Report

Dear Mr. Sahagun:

As part of the development of the Pavement Management Program for the City of Temple City, Harris & Associates hereby submits this 2013 Pavement Management Report.

The information contained in this report presents the findings from the development of the system data associated with the pavement condition survey of the City's street network. The City is also provided with the information that was used to develop the recommended improvement program. The report covers the following categories:

- Pavement Condition Summaries
- Preservation and Repair Activities
- Projected Budgets for Projects based on those Activities

It has been a pleasure working with the City on developing the City's Pavement Management Program. Should you have any questions or comments, please contact us at (949) 655-3900 Extension 2356.

Sincerely,

Harris & Associates

Randall Bliss, PE
Associate / Senior Project Manager

A. Unlimited Funding Level
B. Zero Funding Level
C. Current Funding Level
D. Alternative Funding Level (20- Year)
E. Recommended Funding Level (Maintain Current PCI)
F. Recommended Funding Level (Reach PCI of 71)
G. Recommended Funding Level (Reach PCI of 75)
H. Recommended Funding Level (Reach PCI of 80)
I. Recommended Funding Level (Reach PCI of 85)
J. Recommended Funding Level (Reach PCI of 71 – 2013-14)
K. Recommended Funding Level (Reach PCI of 75 – 2013-14)
L. Recommended Funding Level (Reach PCI of 80 – 2013-14)

VI. Work History Report 82

Appendix – Pavement Condition Index (PCI) Map

EXECUTIVE SUMMARY

Harris & Associates updated the Pavement Management Program (PMP) for the City of Temple City. A field survey of existing pavement conditions was performed on each street by a Harris & Associates inspector as part of this update to the City's current pavement database. The Pavement Management Program (PMP) for the City of Temple City provides a current inventory, with condition and maintenance projections, for the roadways, and a forecasting of the City's budget needs. The federal guidelines specified by the Army Corps of Engineers in their *Pavement Distress Identification Guide for Asphalt-Surfaced Roads and Parking Lots* and *Pavement Distress Identification Guide for Jointed Concrete Roads and Parking Lot*, both dated June 1997, were used as the basis of the field survey. Upon completion of this survey, a Pavement Condition Index (PCI) was calculated for each segment to reflect overall pavement condition. The PCI system is a rating mechanism used to describe the condition of the City's pavement and has been adopted as the nation's standard rating system by AASHTO and ASTM. Ranging between "0" and "100," a PCI of "0" would correspond to a badly deteriorated pavement with virtually no remaining life, while a PCI of "100" would correspond to a pavement with proper engineering design and construction at the beginning of its life cycle.

While the following recommendations have been generated by the Pavement Management Program, they are for planning purposes only and are not intended to replace sound engineering judgment for actual construction. Final project recommendations should be weighed against the actual approach the City wishes to utilize in scheduling the workloads for contracting purposes. In addition, an engineering review of the pavement condition may indicate that a particular pavement section needs attention earlier than the other roads in its localized area. Harris & Associates recommends that all Arterial/Collector (FAU) routes be re-inspected over the course of the next two (2) years. In addition, Harris & Associates recommends that all Local roads, including alleys, be re-inspected over the course of the next four (4) years (approximately 25% of the streets every year).

- **Replacement value & quantity of pavement**
  The pavement network within the City of Temple City has approximately 71 miles of paved surfaces, comprised of approximately 19 miles of residential streets, 10 miles of arterial streets, 39 miles of collector streets and 3 miles of alleys. This equates to almost 13.6 million square feet of pavement. The estimated replacement value of this pavement is approximately $26.3 million for residential streets, $23.7 million for arterial streets, $56 million for collector streets and $2.7 million for alleys, for a total of $109 million.

- **Condition of City's pavement**
  The overall condition of the City of Temple City's road network is "Good", with an average weighted Pavement Condition Index of **62**. Arterial are "Very Good" with a PCI of 77 ,Collector are "Good" with a PCI of 59 and Residential are "Fair" with a PCI of 54, with 100 being a brand new street and 0 being a badly deteriorated street with virtually no remaining life.

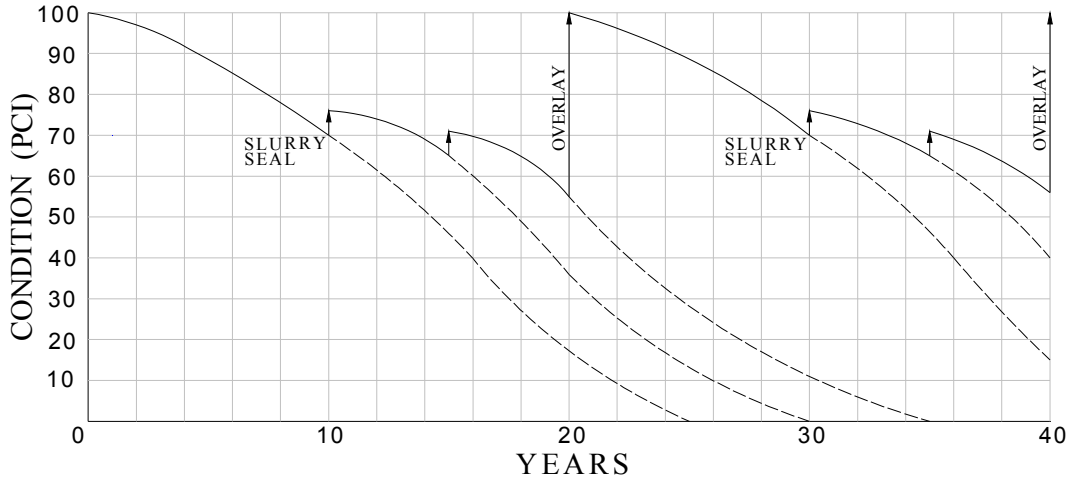

Per the Metro report entitled "Development of a Los Angeles Countywide Pavement Condition Index", dated October 2007, the average pavement condition Countywide is 66. The following is a short list of pavement condition for cities near the City of Temple City.

City	Average PCI	City	Average PCI
Arcadia	63 (2013 Data)	San Gabriel	58 (2012 Data)
Rosemead	75 (2007 Data)	San Marino	85 (2007 Data)

- **Recommended preservation program and costs.**
  A strategy was developed based on a 6-year maintenance cycle. The strategy objective is to reduce the backlog of street preservation work over the next 6 years and increase or maintain the overall condition of the road network. This strategy involves two traditional pavement rehabilitation treatments including both slurry seal and asphalt concrete overlays as preservation components. The strategy also used a 3% annual inflation factor for all maintenance costs.

  As part of the analysis, Harris used the standard pavement deterioration curves developed by the Army Corps of Engineers. These deterioration curves show that asphalt pavement has an expected life of approximately 25 years and Portland cement concrete pavement has an expected life of approximately 50 years.

  Overall Preventative Maintenance Strategy.
  APWA's MicroPaver software program was uses a preventative maintenance strategy in selecting which street segments would benefit in terms of extending the life of the pavement. The graph below depicts the benefit of this approach.

Pavement maintenance funding scenario results:

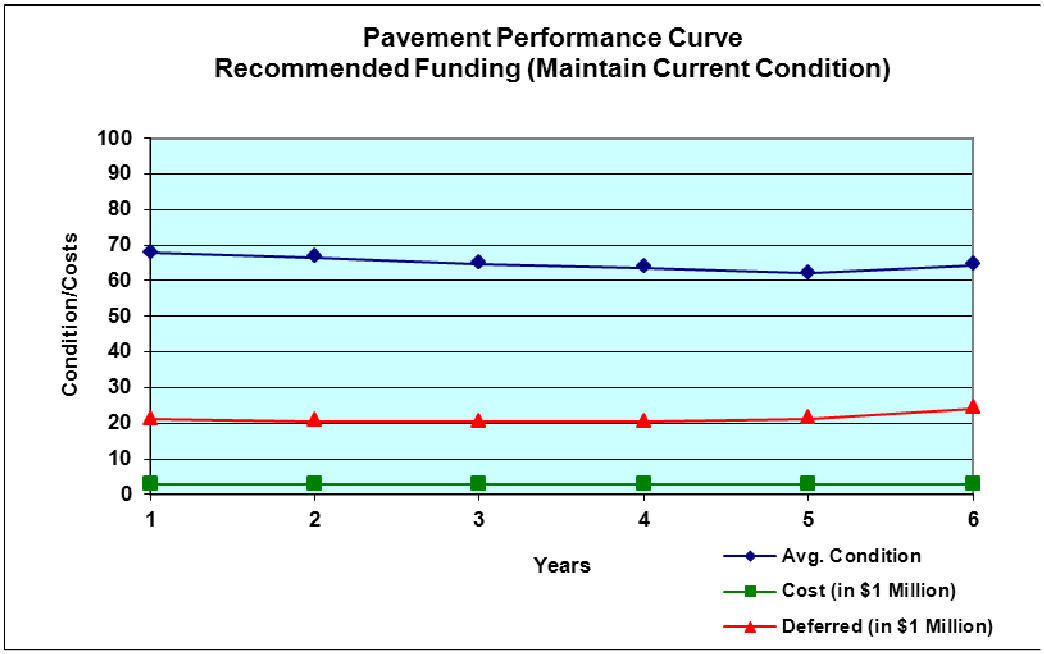

Unlimited Funding - If the City had an unlimited funding source over the next 6 years to fund all pavement maintenance needs, the cost in the first year of the program will be approximately $24 million and the average annual cost thereafter will be approximately $1 million.

FY	Budget	Work Program	Deferred (Citywide)	Average Condition (Citywide)
2013-14	∞	$24,093,454	$0	92
2014-15	∞	$393,145	$0	89
2015-16	∞	$27,851	$0	84
2016-17	∞	$124,971	$0	79
2017-18	∞	$198,447	$0	74
2018-19	∞	$4,722,877	$0	83
6-Year Total		**$29,560,746**		

Recommended Funding (Maintain Current Condition) – In order to maintain the citywide average PCI at or above 62 over the next 6 years, approximately $3 million per year will need to be budgeted.

FY	Budget	Work Program	Deferred (Citywide)	Average Condition (Citywide)
2013-14	$2,971,396	$2,971,396	$21,122,058	68
2014-15	$2,971,556	$2,971,556	$20,547,328	67
2015-16	$2,971,293	$2,971,293	$20,360,431	65
2016-17	$2,971,522	$2,971,522	$20,328,360	64
2017-18	$2,973,919	$2,973,919	$21,219,057	62
2018-19	$2,951,355	$2,951,355	$24,187,618	64
6-Year Total		**$17,811,042**		
6-Year Avg.		**$2,967,929**		

Preventative maintenance on streets with better than average PCI ratings must be considered in combination with the more extensive rehabilitation of failing streets to realize the maximum net benefit and reduce the long term costs. The strategies herein were developed to provide alternatives for halting the deterioration of the existing pavement, reducing the backlog of street maintenance work over the next 6 years and improving the overall condition of the roadway network. These strategies generally involve the utilization of crack sealing, patching, slurry sealing, and major work typically consisting of pavement overlays, overlays with fabric, and reconstruction. Future roadway maintenance plans for the City of Temple City should be based on the general maintenance strategies developed from this pavement system analysis in combination with the other major contributing factors.

SECTION I
INTRODUCTION

NEED FOR PAVEMENT MANAGEMENT SYSTEM

A Citywide Pavement Management Program will assist City personnel by providing current technical data to maintain a desirable level of pavement performance, while optimizing the expenditure of limited fiscal resources.

Specifically, the program provides administrators and maintenance personnel with:

- A current inventory of all public roadways
- The current pavement condition for all public roadways
- A project listing of all pavement needing maintenance, rehabilitation, or replacement
- A forecast of budget needs for maintenance, rehabilitation, or replacement of deficient sections of pavement for a five-year Capital Improvement Program

THE PAVEMENT NETWORK

The entire pavement network within the City of Temple City is comprised of 71.31 centerline (CL) miles of paved surfaces. To assist in planning maintenance needs, the City's road system data was compiled by functional classification. The following is a summary of the mileage, area, and replacement value of pavement by each of these.

By Functional Classification

	Current		
Classification	**Square Feet**	**CL Miles**	**Lane Miles**
Residential	3,297,697	19.34	38.69
Arterial	2,969,390	9.82	36.57
Collector	7,005,452	38.92	78.67
Alleys	339,128	3.23	6.46
Totals	**13,611,667**	**71.31**	**160.39**

Classification	Square Feet	Unit Cost for Replacement	Total Replacement Value	Percent of Replacement Value
Residential	3,297,697	$8.00	$ 26,381,576	24%
Arterial	2,969,390	$8.00	$ 23,755,120	22%
Collector	7,005,452	$8.00	$ 56,043,616	51%
Alleys	339,128	$8.00	$ 2,713,024	2%
Totals	**13,611,667**		**$ 108,893,336**	**100%**

CURRENT CONDITIONS

As part of the update of the Pavement Management Program for the City of Temple City, a windshield survey of the pavement network was conducted to assess the existing surface condition of all streets. The federal guidelines specified by the Army Corps of Engineers in their *Pavement Distress Identification Guide for Asphalt-Surfaced Roads and Parking Lots* and *Pavement Distress Identification Guide for Jointed Concrete Roads and Parking Lot*, both dated June 1997, were used as the basis of the field survey. Upon completion of this survey, a Pavement Condition Index (PCI) was calculated for each segment to reflect overall pavement condition. The PCI system is a rating mechanism used to describe the condition of the City's pavement and has been adopted as the nation's standard rating system by AASHTO and ASTM. Ranging between "0" and "100," a PCI of "0" would correspond to a badly deteriorated pavement with virtually no remaining life, while a PCI of "100" would correspond to a pavement with proper engineering design and construction at the beginning of its life cycle. Refer to graphs in Section III.

The PCI may be weighted based on several factors that may be of special interest to the City, such as pavement distress or ride quality. For the purposes of this analysis, pavement distress was the only factor used to determine the current pavement condition.

The table below relates PCI ranges to general pavement condition definitions.

PCI RANGE	CONDITION
86 –100	Excellent
71 - 85	Very Good
56 - 70	Good
41 - 55	Fair
26 - 40	Poor
11 - 25	Very Poor
0 - 10	Failed

PCI Ranges*

* These are the ranges recommended by the U. S. Army Corps of Engineers.

The overall condition of the City of Temple City's road network based on current conditions is "Good" with an average PCI of 62.

OVERALL STRATEGY

Based on the results of the condition survey and input from the City, pavement maintenance/rehabilitation strategies were developed. A listing of the rehabilitation and maintenance activities utilized in the strategy development is presented in Section II. Each activity is representative of the types of work that have been programmed as part of the long term rehabilitation and maintenance requirements of the City's street network.

The City's streets are comprised of two (2) vastly different pavement types: Asphalt Concrete (AC) and Portland Cement Concrete (PCC). Each surface has different maintenance/rehabilitation requirements and life cycles.

The budgeting process was approached with the following in mind: generate a work program based upon actual road pavement conditions for AC pavements in order to keep deferred maintenance constant and maintain the current high level overall condition. The preventative maintenance approach used will first and foremost attempt to keep street segments in good condition to remain in good condition as opposed to focusing on street requiring complete reconstruction.

Based on current and projected pavement rehabilitation and maintenance needs, annual work programs have been prepared. The tables on the following pages show the projected work program totals along with the total deferred maintenance for each year.

All work program budgets generated are presented using only 3% inflation. All repair activities were based on distresses observed at the time of the field survey. No adjustments were made for cracking that may develop before work is actually completed.

RECOMMENDATIONS

The actual workload requirements identified indicate that the street network is currently in Good condition. To maintain this PCI condition, it is critical that the preservation activities be funded at the levels identified in the recommended work program to maintain a high network PCI value.

In order to meet these requirements, certain projects have been recommended within the context of this program. The funding requirements just presented are generated in the form of individual projects, as outlined in the Projected Work Reports (Section V).

While the project listings outlined in Section V are the recommendations as generated by the PMP, they are for planning purposes only and are not intended to replace engineering judgement. Before construction has actually started on the pavement work, field verification should be conducted to ascertain whether PCI conditions still warrant the recommended treatment or whether they have worsened. Final project recommendations should be weighed against the actual approach the City wishes to utilize in scheduling the workloads for contracting purposes. Pavement condition may indicate that a particular pavement section needs attention earlier than the rest of the roads in its localized area.

MAINTENANCE PROGRAM RECOMMENDATIONS

Because pavement deterioration is a never-ending phenomenon, Harris & Associates recommends that all Arterial/Collector (FAU) routes be re-inspected over the course of the next two (2) years. In addition, Harris & Associates recommends that all Local roads, including alleys, be re-inspected over the course of the next four (4) years (approximately 25% of the streets every year). The costs for the re-inspection should be included in the annual pavement management budget to assure that the PMP has updated, accurate information.

FUNDING SOURCES

This report outlines various funding options and treatment strategies that the city can use in developing a program for roadway preservation. Once an overall strategy has been agreed upon the City will need to determine how the program will be funded. Typical funding sources include the City's general fund, local gas taxes allocated for transportation, state and federal transportation programs, various grants and incentive programs or by the sale of municipal bonds. It should be noted that most federal, state and local funding is allocated for larger arterial roadways that benefit the maximum amount of the public. Most outside funding will not support residential rehabilitation programs because they only benefit a small number of people. One funding strategy would be to use a portion of the City's general fund or a bond measure for the rehabilitation of the residential streets and to pursue outside funding for the rehabilitation of arterial and collector roadways.

Metro is responsible for allocating discretionary federal, state and local transportation funds to improve all modes of surface transportation. Metro also prepares the Los Angeles County Transportation Improvement Program (TIP). A key component of TIP is the Call for Projects program, a competitive process that distributes discretionary capital transportation funds to regionally significant projects.

Every other year, Metro accepts Call for Projects applications in eight modal categories. Local jurisdictions, transit operators, and other public agencies are encouraged to submit applications proposing projects for funding.

The following summary of some of the programs available for funding:

Measure 'R'

In November 2008, Measure R was approved by an amazing two-thirds majority, committing a projected $40 billion to traffic relief and transportation upgrades throughout LA County over the next 30 years.

Proposition 'C'

Prop C funds are allocated to a variety of capital and operating projects and programs that improve transit service and operations, reduce traffic congestion, improve air quality, and efficiently operate and improve the condition of streets and freeways utilized by transit.

Prop C was approved by Los Angeles County voters in November 1990 with revenues generated by a half-cent sales tax. By ordinance, revenues from Proposition C are allocated into categories including Rail & Bus Security; Commuter Rail, Transit Centers, and Park and Ride Lots; Local Return; and, Transit Related Improvements to Streets and Highways

SECTION II
METHODOLOGY

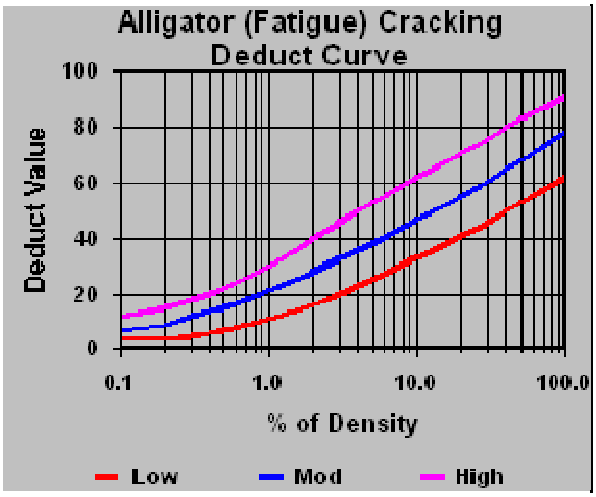

The following section provides a description of the methodology and rationale utilized in determining the recommended actions identified in this report.

Field Survey

An inventory of street data for Residential and Arterial/Collector streets within the City of Temple City was completed. Data, including distress types and quantities, segment length and width, etc., was collected on all public streets. Using a combination of City street maps and field survey forms to collect field information, a field crew surveyed each street. The information collected on the field survey forms included low, medium and high distresses, amount of distress, verification of special conditions and a field check of segment data such as length, number of lanes and whether the street included a cul-de-sac.

Data was categorized by street and "maintenance" segment. Maintenance segment limits were identified by determining the logical maintenance practices that would apply to each street and may vary from street to street, i.e. intersection to intersection, change in pavement width, drainage conditions, crown of the roadway, etc. All data collected was entered into the APWA MicroPAVER version 6.5 pavement management software.

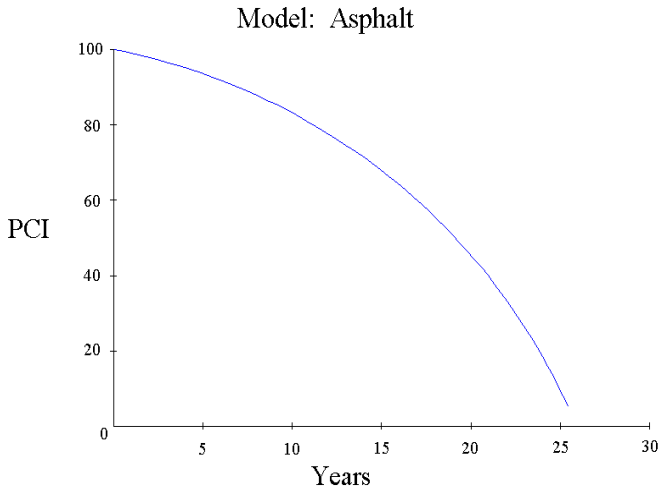

After the data entry procedures were completed, a resultant distress rating was calculated for each segment. The distress rating is calculated using an algorithm developed by the Army Corps of Engineers that is recommended by the American Public Works Association and incorporated within the MicroPAVER software. The algorithm begins by giving each pavement section a score of 100 then deducting point values based on the pavement distress found within the section weighted by the quantity of distress. The Army Corps has assigned deduct values based on severity (low, moderate, or high) and the density of each distress, as shown below in the case of alligator (fatigue) cracking.

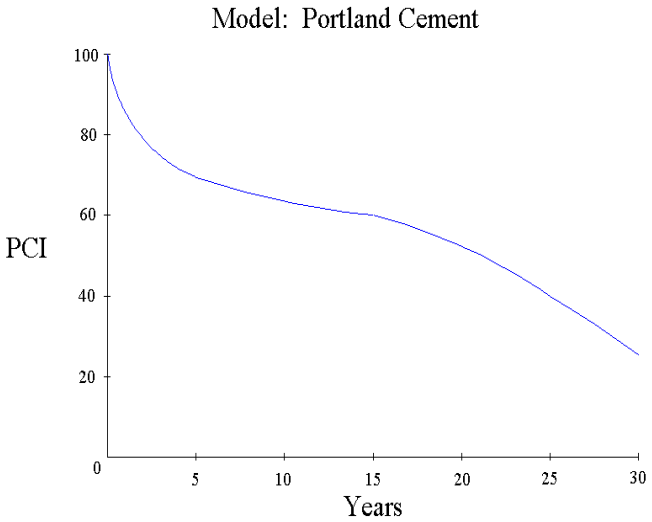

The algorithm weighs the total deducts within a section and calculates a total distress rating between 0 (failed) and 100 (excellent).

The PCI is an overall measure of the condition of the road surface based on this scale. The summary of all road condition data and the representative PCI's are located in the Condition Data Report in Section IV.

Once the PCI has been established for a pavement section, the analysis and workload predictions can be commenced. The deterioration curve below shows the expected deterioration rate for Asphalt Concrete (AC) and Portland Cement Concrete (PCC).

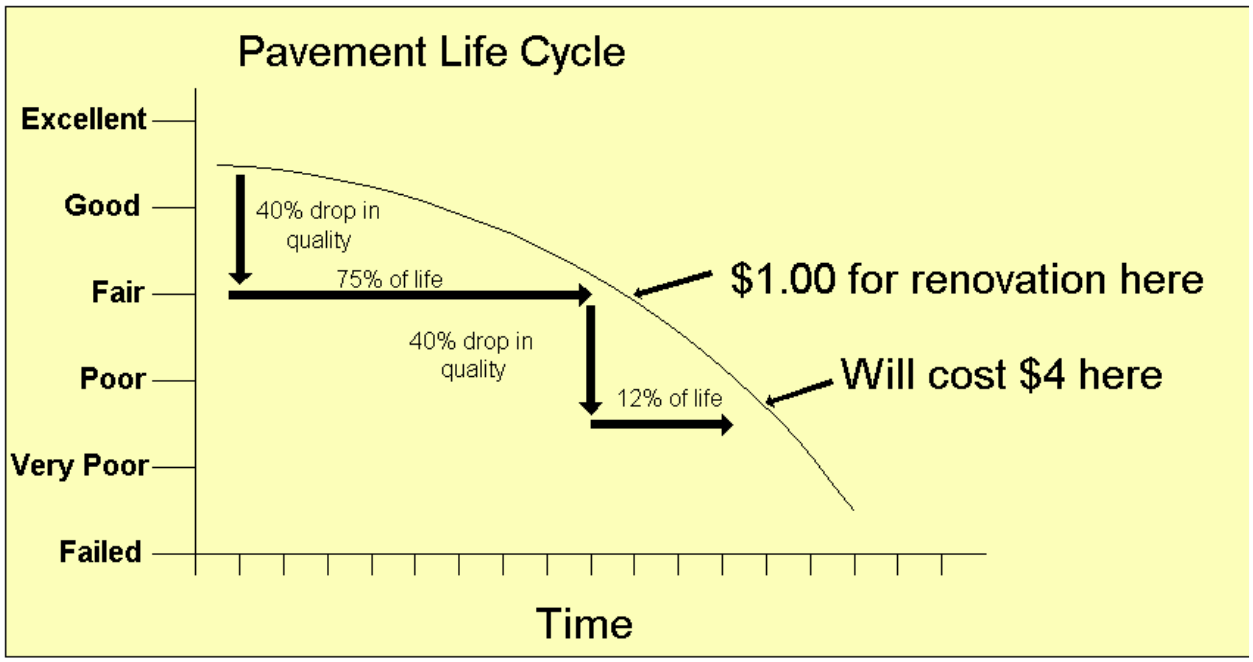

Standard Deterioration Curve for Asphalt Concrete (AC) Pavements
Expected Useful Life of Approximately 25 Years

Standard Deterioration Curve for Portland Cement Concrete (PCC) Pavements
Expected Useful Life of Approximately 50 Years

As a pavement ages, the system predicts the PCI of the pavement based on the deterioration curves. The next step in the analysis is to determine at what point simple maintenance has become major rehabilitation.

As you can see by the above graphic, by doing preventative maintenance on a pavement earlier in the pavements life, a substantial amount of money can be saved.

MAINTENANCE STRATEGY ASSIGNMENTS

The PCI is used by the system to schedule each pavement segment for maintenance activities. The Micro PAVER program recommends a specific maintenance activity based on the PCI and budget constraints. The Micro PAVER system generates work based on categories of maintenance, such as localized, global and major maintenance. Maintenance activities per category are defined as follows:

Localized Maintenance - Maintenance treatments generally utilized as "holding action" solutions to delay the need for pavement structural strengthening. Generally they include the following activities:

Localized Maintenance		
Repair Type	Cost	Unit
Patching - AC Deep	$9.50	SF
Patching - AC Leveling	$3.00	SF
Patching - AC Shallow	$7.00	SF
Patching - PCC Full Depth	$10.50	SF
Patching - PCC Partial Depth	$8.00	SF
Slab Replacement - PCC	$9.00	SF
Crack Sealing - PCC	$0.10	LF
Undersealing - PCC	$0.30	SF
Crack Sealing - AC	$0.10	LF
Grinding (Localized)	$2.25	SF
Joint Seal (Localized)	$1.00	LF
Joint Seal - Silicon	$6.56	LF
Skin Patch	$2.00	SF

Note: "Partial Depth" refers to grinding vs. full reconstruction.

Global Maintenance - surface treatments generally utilized to provide new wearing surfaces and extend pavement life.

Surface treatments applied to pavements with minimal surface distress to provide new wearing surfaces and extend pavement life. Generally it consists of a sealant or thin overlay. For the City of Temple City, a slurry seal was programmed in the Recommended (M&R and Global) scenario at an application interval of 5 years for streets exhibiting minimal distress or climate related distress only. The typical cost for a slurry seal is $0.30 per square foot. Slurry seals are not typically used on high volume streets where the amount of traffic would severely impact the effectiveness of the seal. Therefore, arterial roadways are not usually considered a candidate for this type of treatment. PCC streets are also not a candidate for this type of treatment.

Major Maintenance – The application of treatments that are more cost-effective alternatives to reconstruction of the entire pavement surfaces, but provide the required structural support. Major maintenance also includes reconstruction, if required.

The Micro PAVER system derives costs for major maintenance based on cost by condition ranges. The following are the costs Harris & Associates recommends for both AC and PCC streets.

Condition	Unit Cost	System Designation	Possible Major Maintenance
0	$8.00	Major Maint < Critical	Reconstruction
10	$8.00		
20	$4.00		Mill & Overlay w/ Fabric
30	$4.00		
40	$4.00		
50	$3.35		Mill & Overlay
60	$3.35	Major Maint >= Critical	
70	$3.35		
80	$3.35		
90	$0.00		No Major Maint.
100	$0.00		

Note: Major Maint < Critical is defined as major work required on a pavement section where the pavement condition is less that the critical PCI.
Major Maint >= Critical is defined as major work required on a pavement section where the pavement condition is greater than or equal to the critical PCI.

The Army Corps of Engineer's defines the critical condition for an asphalt roadway as a PCI of 55. According to their research, it is this PCI level that is the point of no return between preventative maintenance and more costly rehabilitation. The critical condition of PCI 55 is the default setting for the APWA Micro PAVER system.

Once a street segment reaches a PCI of 55, the street segment deteriorates at a faster rate per the standard deterioration curve for asphalt pavement.

- *AC Overlay* - Placement of a layer of hot-mixed asphalt concrete (1.5 to 2.0 inches in thickness) over the existing pavement surface. Cold planing is performed prior to the overlay to reduce the total height of asphalt and assure alignment with existing gutter line. This also includes "dig-outs" and crack sealing prior to the application of an overlay. This treatment provides a new wearing surface and increased structural strength to the pavement section. A conventional overlay should be designed for a seven to ten year life.

- *AC Overlay with Reinforcing Fabric* - A conventional 1.5 or 2.0 inch overlay preceded by the placement of a woven reinforcing fabric (Petromat, Glassgrid, Ammopave, etc.) set in a prescribed amount of asphalt binder. Cold Planing, "dig-outs" and crack sealing are performed, as well. Typically used where structural strengthening is required. An overlay with reinforcing fabric should be designed for a ten to fifteen year life.

Portland Cement Concrete (PCC) Streets

Although PCC Streets were not analyzed in this report, the following are typical maintenance treatments:

- *Concrete Patches*- Removal and replacement of a localized area of the PCC roadway, typically within a single slab. The patch may be either a partial depth patch, only removing and replacing the PCC, or a full depth patch removing and replacing the entire structural section below the patch area. Doweling into the adjacent PCC slab is typically recommended to prevent the patch from lifting or moving. This will cost $8.00 to $11.00 per square foot.

- *Grinding and Smoothing* – Using a grinding wheel, smooth out areas suffering from poor ride quality. This will cost approximately $2.25 per square foot.

- *Panel Replacements* – Replacement of PCC panels, or slabs, consists of removing the existing slab and underlying base material and replacing in kind. This will cost approximately $9.00 per square foot.

- *Rubberized Asphalt Overlay* - Placement of a layer of hot-mixed rubberized asphalt concrete (1.2 to 2.0 inches in thickness) over the existing pavement surface. Cold planing is performed prior to the overlay to assure alignment with existing gutter line. This also includes "dig-outs" and crack sealing prior to the application of an overlay. This treatment provides a new wearing surface and increased structural strength to the pavement section. This will cost approximately $2.70 per square foot.

MAINTENANCE & REPAIR DECISIONS

Once the activities were chosen and unit costs were defined, budgets and work assignments were generated for each work program on an annual basis. Using the pavement deterioration curves for each type of pavement surface and class of road, both current year and future years work requirements for each pavement segment within the City were determined. The current PCI is reduced annually based on the deterioration curve; maintenance activities increase the PCI value as they are applied to the segment. The overall program is dynamic in that each strategy consists of a cyclic series of actions that simulates pavement's anticipated life cycle.

PROJECTED WORK PROGRAMS

In developing an annual expenditure level required to maintain the street network at its current average PCI level, twelve (12) budget scenarios were studied.

The following terms are defined for this sub-section:

"Year" – Year of the program.

"Budget" – The projected budget for a given year.

"Work Program" – The amount of money programmed to be expended, not to exceed the budget, based on the pavement maintenance needs as prioritized.

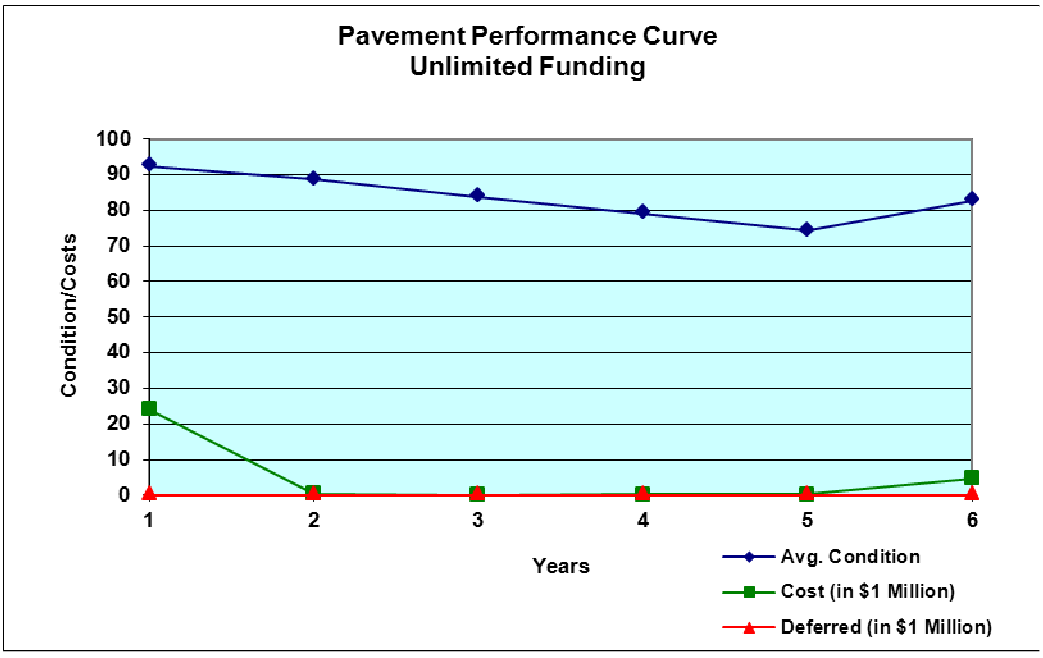

"Deferred" or "Deferred maintenance" – The amount of money projected for pavement maintenance that cannot be performed due to lack of funding. The total pavement maintenance needs less the work program.

"Average Condition" – The projected average pavement condition after completion of the Work Program.

Unlimited Funding - If the City had an unlimited funding source over the next 6 years to fund all pavement maintenance needs, the cost in the first year of the program will be approximately $24 million and the average annual cost thereafter will be approximately $1 million.

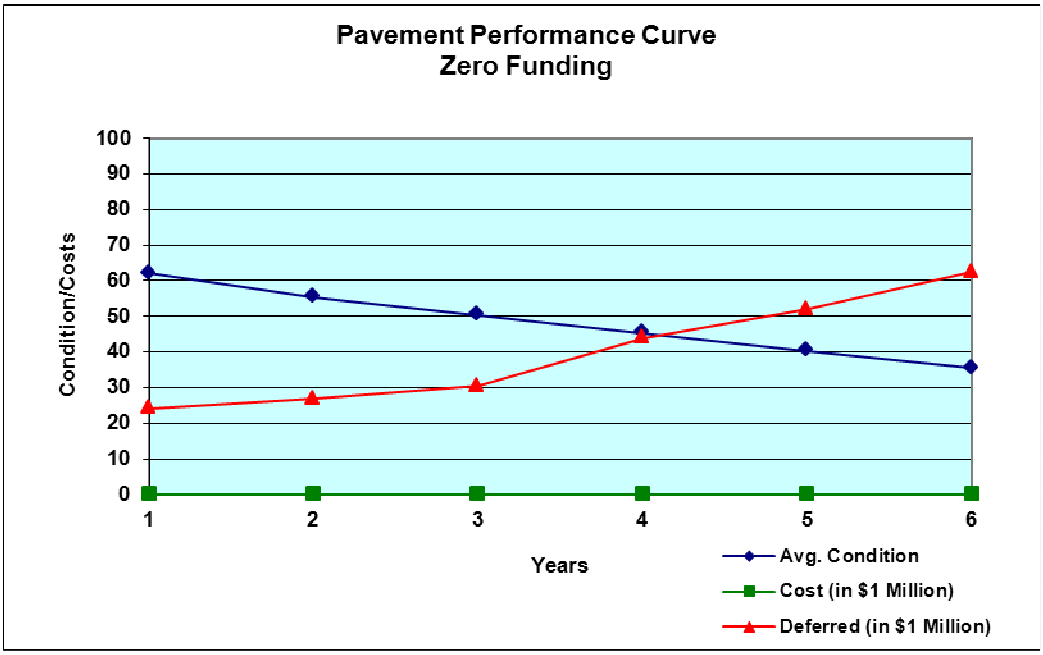

In this Unlimited Funding scenario, the MicroPaver program will attempt to get the entire street network to the "Excellent" condition. Any street segment whose PCI falls within the range of an applicable predetermined treatment range will receive it. Please note that while the program's aim is to have an "Excellent " condition, it will not recommend a treatment for a street segment which will not benefit in terms of extending its life.

FY	Budget	Work Program	Deferred (Citywide)	Average Condition (Citywide)
2013-14	∞	$24,093,454	$0	92
2014-15	∞	$393,145	$0	89
2015-16	∞	$27,851	$0	84
2016-17	∞	$124,971	$0	79
2017-18	∞	$198,447	$0	74
2018-19	∞	$4,722,877	$0	83
6-Year Total		**$29,560,746**		

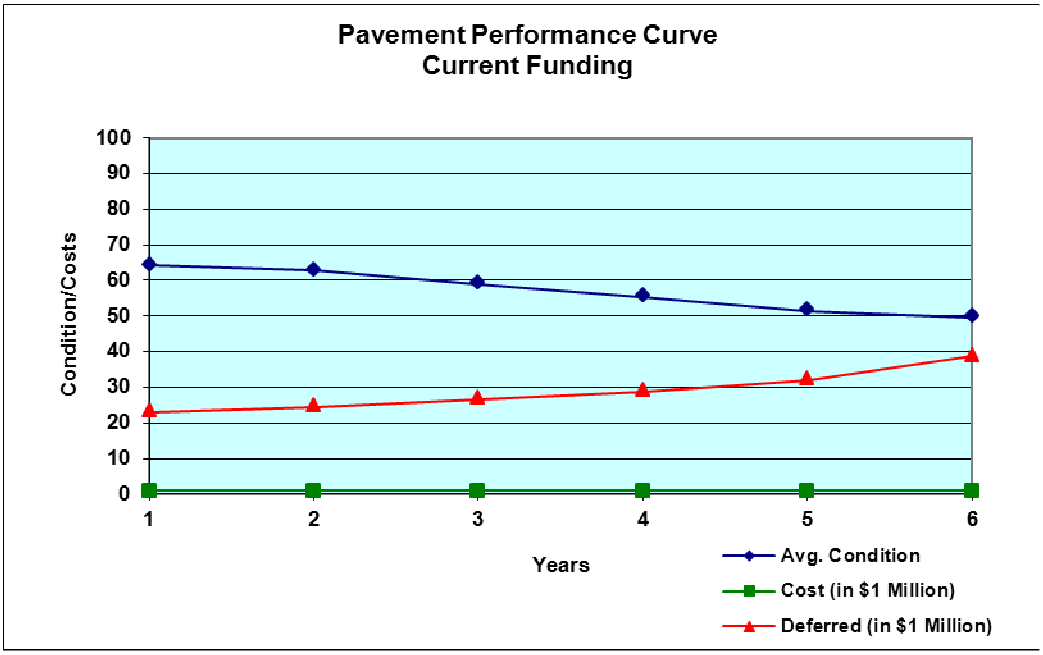

Zero Funding - If the City spent no money over the next 6 years on pavement maintenance needs, the amount of deferred maintenance (or "backlog") citywide will increase from $24 million to $62 million and the citywide average pavement condition index will decrease from 62 to 35.

FY	Budget	Work Program	Deferred (Citywide)	Average Condition (Citywide)
2013-14	∞	$0	$24,093,454	62
2014-15	∞	$0	$26,744,765	55
2015-16	∞	$0	$30,415,740	50
2016-17	∞	$0	$43,928,684	45
2017-18	∞	$0	$52,024,113	40
2018-19	∞	$0	$62,450,915	35
6-Year Total		**$0**		

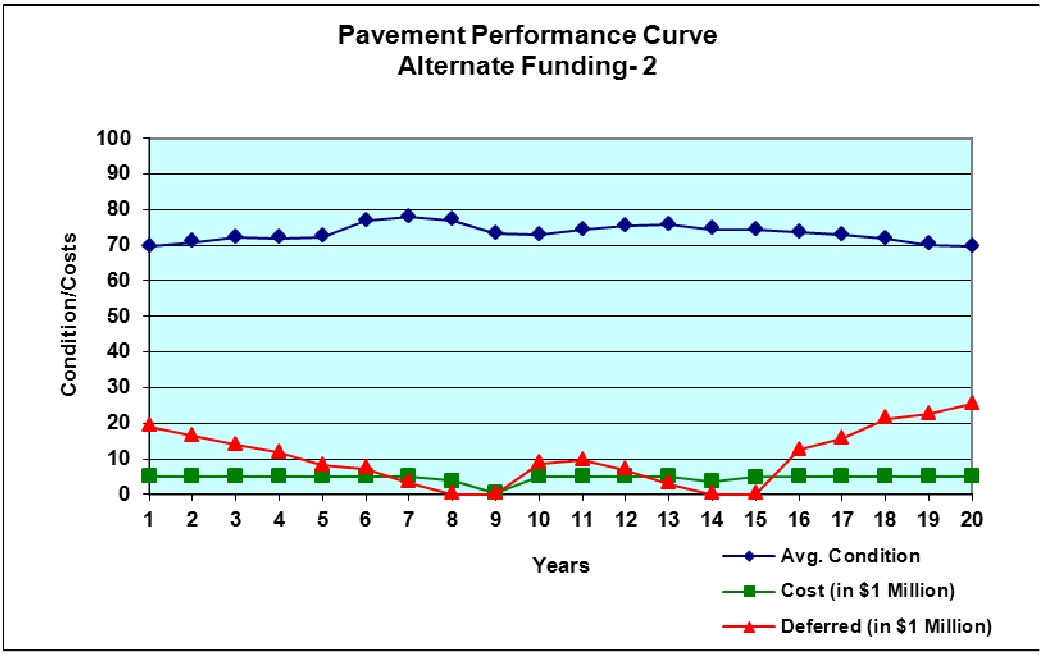

Current Funding – At the City's current expected pavement maintenance budget over the next 6 years of approximately $1 million annually, the amount of deferred maintenance citywide will increase from $23 million to $39 million and the citywide average pavement condition index will decrease from 64 to 50.

FY	Budget	Work Program	Deferred (Citywide)	Average Condition (Citywide)
2013-14	$999,674	$999,674	$23,093,780	64
2014-15	$999,388	$999,388	$24,550,369	63
2015-16	$995,611	$995,611	$26,544,780	59
2016-17	$995,540	$995,540	$28,759,921	55
2017-18	$998,841	$998,841	$32,018,607	51
2018-19	$997,444	$997,444	$38,670,215	50
6-Year Total		**$5,986,499**		
6-Year Avg.		**$997,365**		

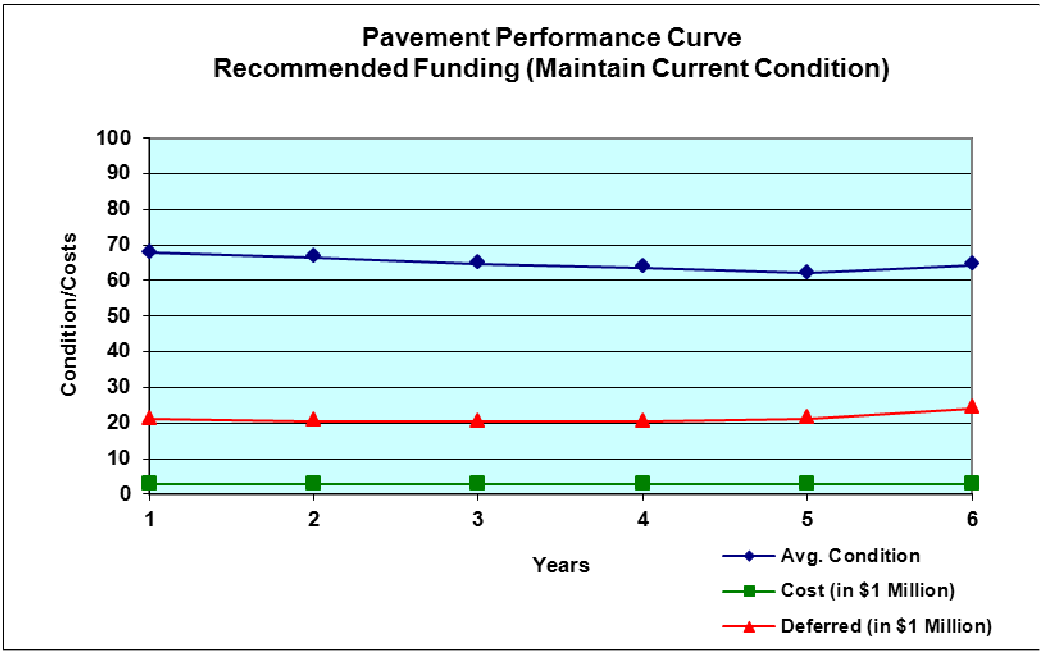

Alternative Funding - If the City spent $93 million over the next 20 years on pavement maintenance needs, the amount of deferred maintenance (or "backlog") citywide will increase from $19 million to $25 million and the citywide average pavement condition index will remain 70 by the 20th year.

FY	Budget	Work Program	Deferred (Citywide)	Average Condition (Citywide)
2013-14	$4,999,868	$4,999,868	$19,093,587	70
2014-15	$4,997,549	$4,997,549	$16,378,178	71

Recommended Funding (Maintain Current Condition) – In order to maintain the citywide average PCI at or above 62 over the next 6 years, approximately $3 million per year will need to be budgeted.

FY	Budget	Work Program	Deferred (Citywide)	Average Condition (Citywide)
2013-14	$2,971,396	$2,971,396	$21,122,058	68
2014-15	$2,971,556	$2,971,556	$20,547,328	67
2015-16	$2,971,293	$2,971,293	$20,360,431	65
2016-17	$2,971,522	$2,971,522	$20,328,360	64
2017-18	$2,973,919	$2,973,919	$21,219,057	62
2018-19	$2,951,355	$2,951,355	$24,187,618	64
6-Year Total		**$17,811,042**		
6-Year Avg.		**$2,967,929**		

Recommended Funding (Reach PCI of 71) - In order to reach the average PCI at 71 on the first year of the program, the cost will be approximately $7.7 million.

FY	Budget	Work Program	Deferred (Citywide)	Average Condition (Citywide)
2013-14	$7,760,192	$7,760,192	$16,444,849	71

Recommended Funding (Reach PCI of 75) - In order to reach the average PCI at 75 on the first year of the program, the cost will be approximately $11.1 million.

FY	Budget	Work Program	Deferred (Citywide)	Average Condition (Citywide)
2013-14	$11,158,551	$11,158,551	$13,046,491	75

Recommended Funding (Reach PCI of 80) - In order to reach the average PCI at 80 on the first year of the program, the cost will be approximately $14.7 million.

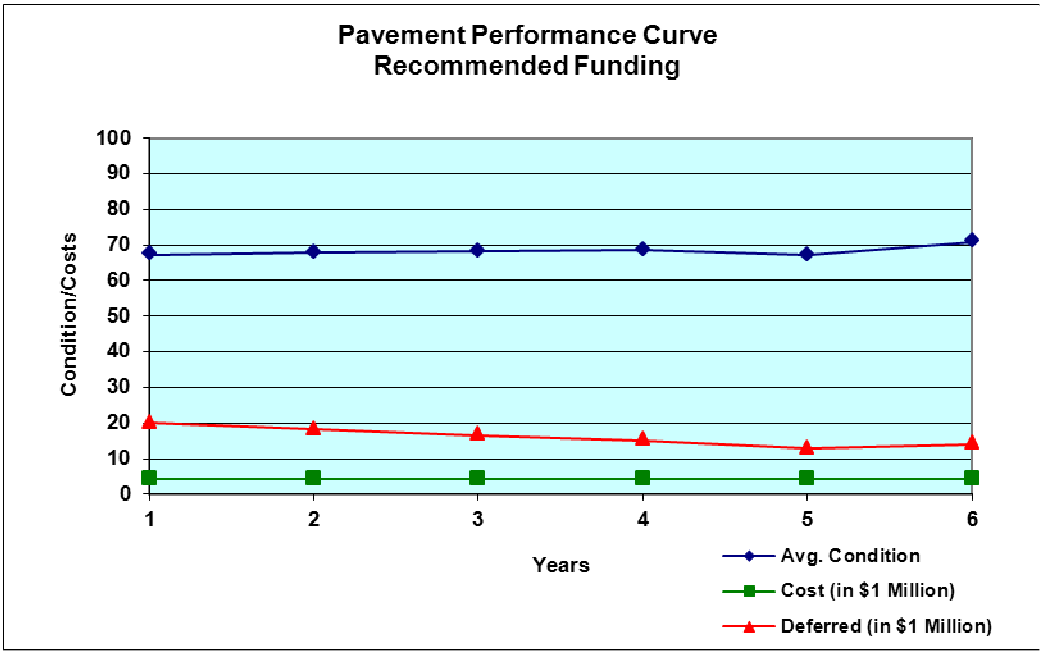

FY	Budget	Work Program	Deferred (Citywide)	Average Condition (Citywide)
2013-14	$14,748,555	$14,748,555	$9,456,486	80

Recommended Funding (Reach PCI of 85) - In order to reach the average PCI at 85 on the first year of the program, the cost will be approximately $19.2 million.

FY	Budget	Work Program	Deferred (Citywide)	Average Condition (Citywide)
2013-14	$19,285,903	$19,285,903	$4,919,139	85

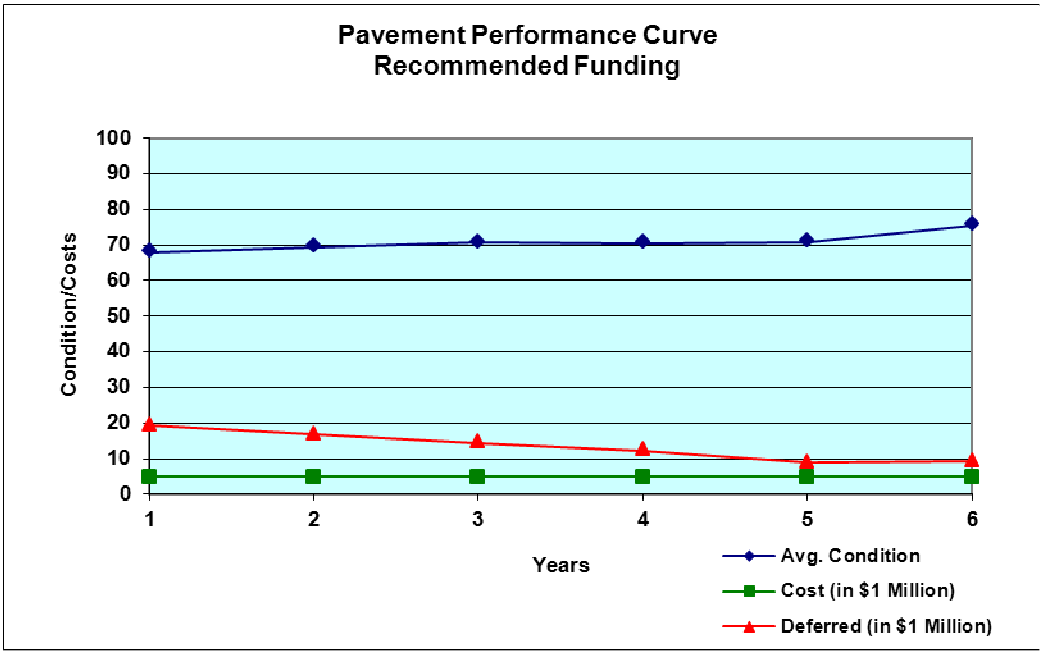

Recommended Funding (Reach PCI of 71) - In order to reach the average PCI at 71 on the 6th year of the program, the cost will be approximately $4.2 million per year, the amount of deferred maintenance citywide will decrease from $20 million to $14 million.

FY	Budget	Work Program	Deferred (Citywide)	Average Condition (Citywide)
2013-14	$4,262,534	$4,262,534	$19,942,507	67
2014-15	$4,261,940	$4,261,940	$18,125,829	68
2015-16	$4,259,940	$4,259,940	$16,547,123	68
2016-17	$4,261,192	$4,261,192	$15,055,756	68
2017-18	$4,258,862	$4,258,862	$12,706,714	67
2018-19	$4,251,940	$4,251,940	$14,130,732	71
6-Year Total		**$25,556,407**		
6-Year Avg.		**$4,258,775**		

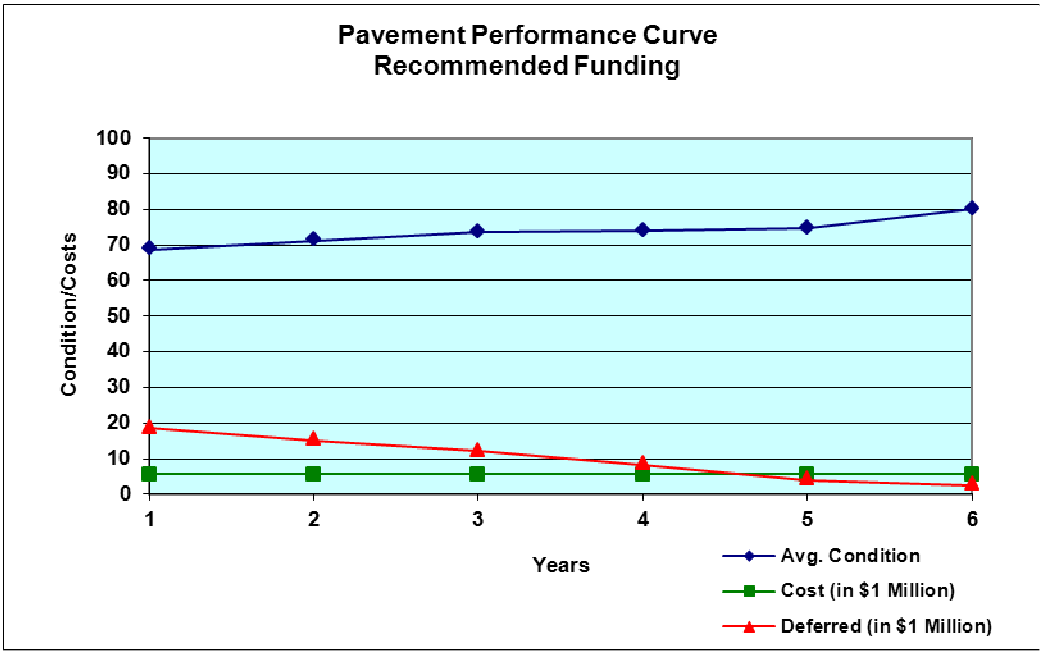

Recommended Funding (Reach PCI of 75) - In order to reach the average PCI at 75 on the 6th year of the program, the cost will be approximately $5 million per year, the amount of deferred maintenance citywide will decrease from $20 million to $9 million.

FY	Budget	Work Program	Deferred (Citywide)	Average Condition (Citywide)
2013-14	$4,924,825	$4,924,825	$19,280,217	68
2014-15	$4,922,653	$4,922,653	$16,741,270	69
2015-16	$4,921,288	$4,921,288	$14,457,103	71
2016-17	$4,920,198	$4,920,198	$12,168,094	71
2017-18	$4,917,048	$4,917,048	$8,829,756	71
2018-19	$4,904,005	$4,904,005	$9,243,321	75
6-Year Total		**$29,510,015**		
6-Year Avg.		**$4,917,038**		

Recommended Funding (Reach PCI of 80) - In order to reach the average PCI at 80 on the 6th year of the program, the cost will be approximately $5.7 million per year, the amount of deferred maintenance citywide will decrease from $19 million to $3 million.

FY	Budget	Work Program	Deferred (Citywide)	Average Condition (Citywide)
2013-14	$5,677,803	$5,677,803	$18,527,239	69
2014-15	$5,677,252	$5,677,252	$15,162,571	71
2015-16	$5,680,574	$5,680,574	$12,072,882	74
2016-17	$5,680,003	$5,680,003	$8,263,694	74
2017-18	$5,666,336	$5,666,336	$4,054,056	75
2018-19	$5,669,812	$5,669,812	$2,609,693	80
6-Year Total		**$34,051,779**		
6-Year Avg.		**$5,674,795**		

PAVEMENT MANAGEMENT SYSTEM REPORTS

In addition to the annual budgets, this report contains a comprehensive assemblage of pavement management reports ranging from summary reports to annual maintenance and rehabilitation schedules. Collectively, as well as individually, the reports represent reasonable projections of pavement maintenance needs and performance based on field condition assessments, unit cost estimates, and pavement deterioration models.

It is important to note that pavement segment dimensions and surface area, along with the action and repair costs, as presented on the reports, are accurate within tolerable limits. This is noteworthy due to the "implied" accuracy of reporting length and width to the nearest foot, surface area to the nearest square foot, and action and repair unit costs and project estimates to the nearest penny and dollar, respectively.

SYSTEM MAINTENANCE

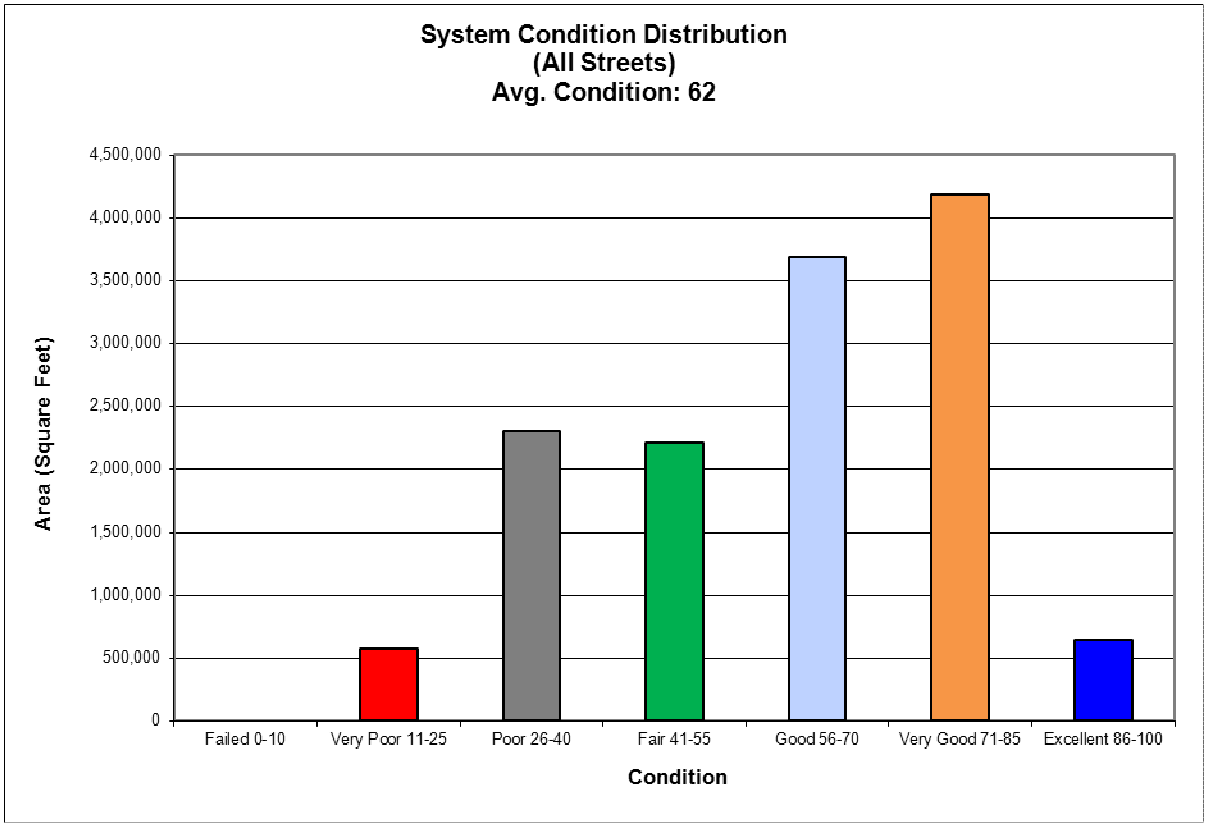

The City personnel need to maintain their commitment to the preventive maintenance system, while working toward reducing the City's present backlog of rehabilitation projects.

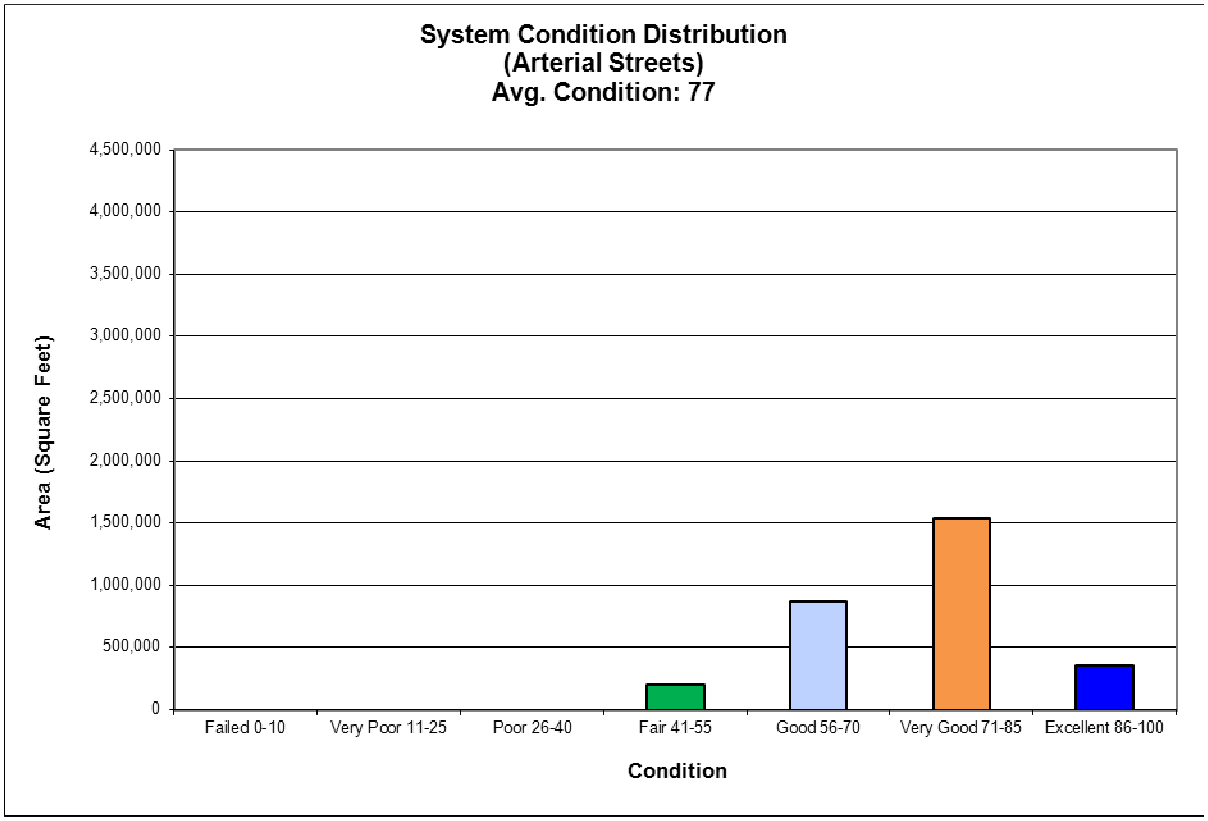

In order to ensure that report outputs are accurate and credible, it is essential that the integrity of all data files be maintained. This will require performing all necessary updates when changes are made to scheduling scenarios, unit cost information, historical data, etc. In addition, the entire pavement network will have to be re-inventoried at regular intervals. This will not only allow work to be scheduled based on the most current condition data available, but will provide City personnel with a means to monitor actual rates of pavement deterioration so appropriate modifications can be made to the system curves.

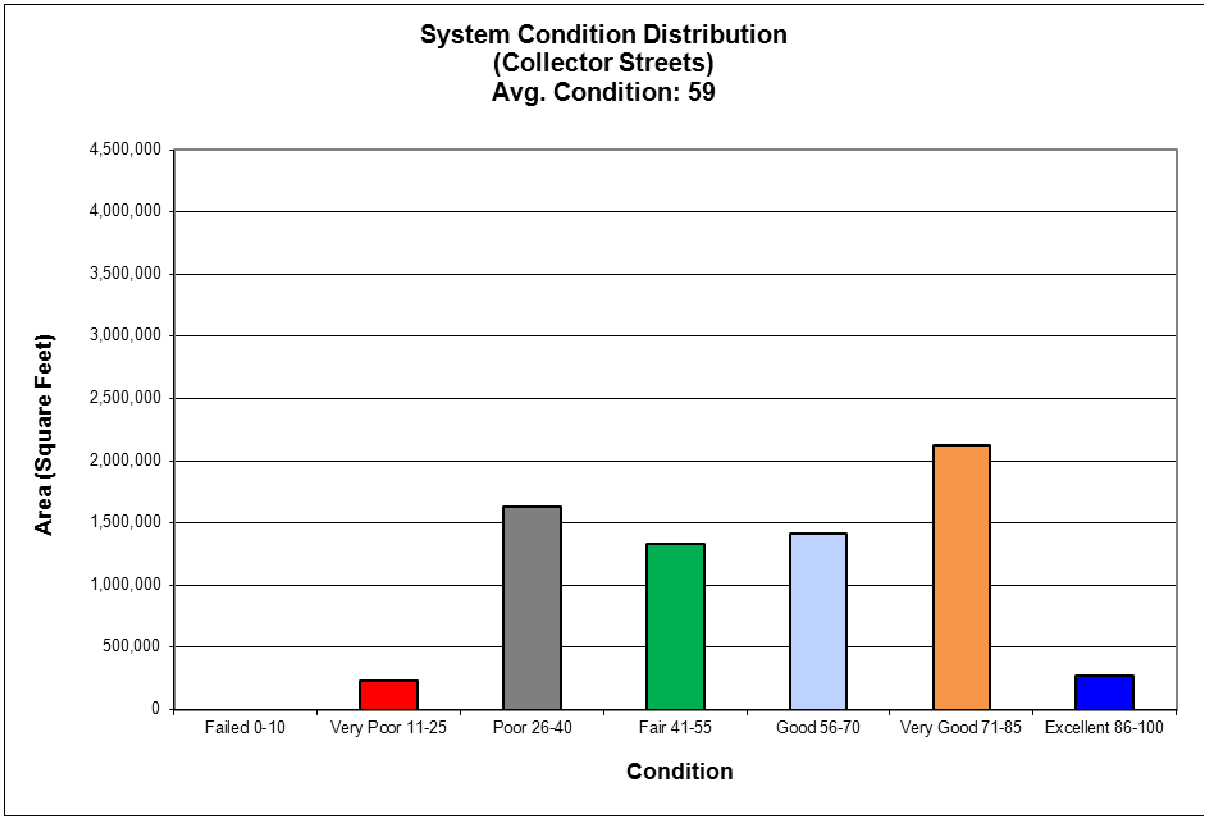

SECTION III
CONDITION DISTRIBUTION REPORT

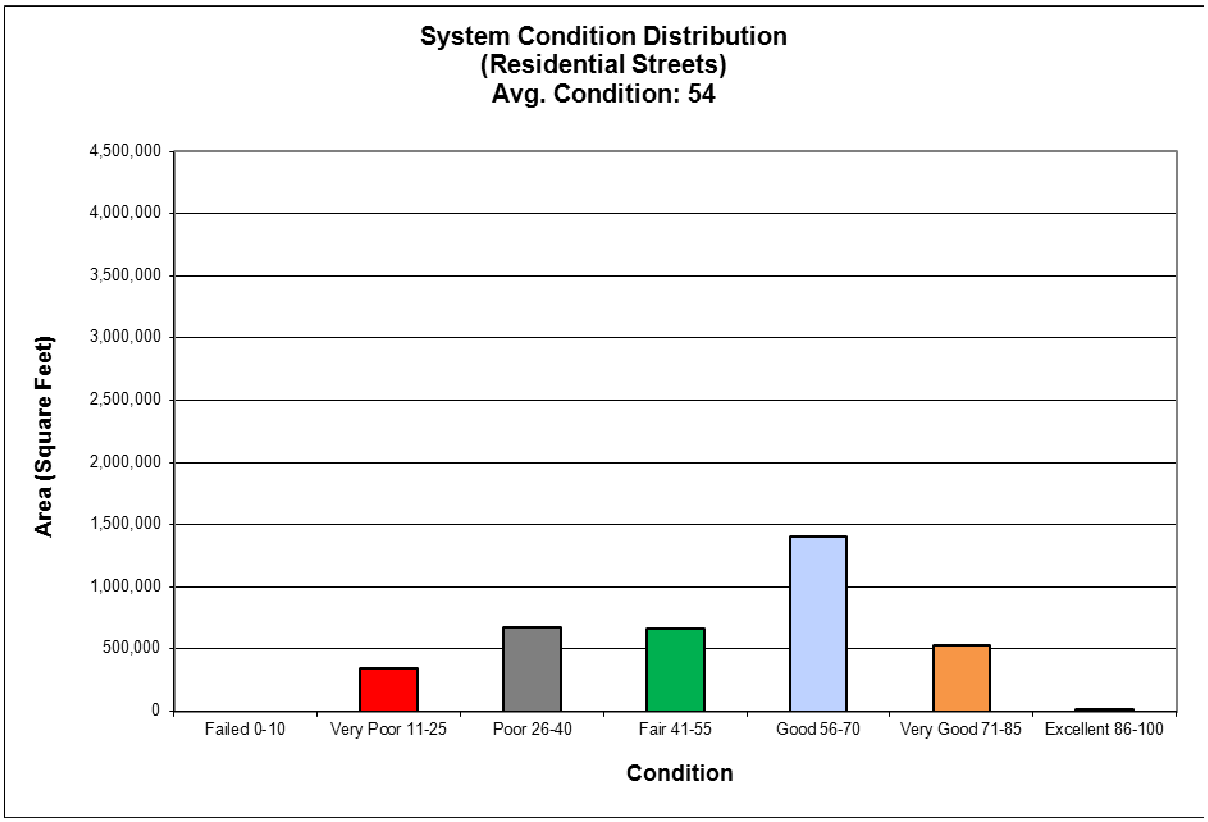

This report graphically depicts the distribution of the pavement condition throughout the street network by pavement area. The condition ranges from a PCI of 0 "Failed" to 100 "Excellent", with an "Excellent" condition corresponding to a pavement at the beginning of its life cycle, and a "Failed" condition representing a badly deteriorated pavement with virtually no remaining life. The tables on the following pages show the general description for each pavement condition:

Condition	PCI Range	Description
Excellent	86 - 100	No significant distress.
Very Good	71 - 85	Little distress, with the exception of utility patches in good condition, or slight hairline cracks; may be slightly weathered.
Good	56 - 70	Slight to moderately weathered, slight distress, possibly patching.
Fair	41 - 55	Severely weathered or slight to moderate levels of distress generally limited to patches and non-load-related cracking.
Poor	26 - 40	Moderate to severe distresses including load-related types, such as alligator cracking.
Very Poor	11 - 25	Severely distressed or large quantities of distortion or alligator cracking.
Failed	0 - 10	Failure of the pavement, distress has surpassed tolerable rehabilitation limits.

SECTION IV
PAVEMENT CONDITION INDEX (PCI) REPORT

Listed alphabetically by street name, this report provides the City with a listing of pertinent inventory and pavement condition data for each pavement section within the City's pavement network. The Pavement Condition Index (PCI) Report notes the names, limits, classification, dimension, pavement class and PCI as of the last inspection for each pavement section.

Detailed descriptions of the information appearing on this report are presented below:

Branch Name – The name of each pavement section appears in this column. Generally, the pavement section name is taken directly from a street sign; however, where no street signs are posted, the name appearing on the network map is noted instead.

Section – The section number along each branch assigned to each pavement segment

From – A description of the beginning limit of each pavement section appears in this column.

To – A description of the ending limit of each pavement section appears in this column.

Surface – A code was assigned to each pavement section to describe surface type.

CODE	DESCRIPTION
AC	Asphalt Concrete
AAC	Asphalt Concrete over Asphalt Concrete
PCC	Portland Cement Concrete

Classification – The classification of each pavement section appears in this column. Typically, street segments are classified according to traffic volume or the agency's circulation element.

CODE	DESCRIPTION
A	Arterial
C	Collector
E	Residential
O	Alley

Lanes – The number of lanes in the pavement section.

Length – The length of the pavement section. Street segment lengths, as determined by City staff, run from centerline to centerline.

Area – The area of the pavement section.

Inspection Date – The date each pavement section was last inspected.

PCI – Pavement Condition Indexes were calculated for pavement sections based on severity and extent of distress manifestations observed within the pavement section. Ranging between 0 and 100, a PCI of "100" corresponds to a pavement at the beginning of its life cycle, while a PCI of "0" corresponds to a badly deteriorated pavement which is at or near the end of its life cycle.

Ave. Weighted PCI 62

SECTION V
PROJECTED WORK PROGRAMS

In developing an annual expenditure level required to maintain the street network at its current average PCI level, twelve (12) budget scenarios were studied.

Unlimited Funding - If the City had an unlimited funding source over the next 6 years to fund all pavement maintenance needs, the cost in the first year of the program will be approximately $24 million and the average annual cost thereafter will be approximately $1 million.

FY	Budget	Work Program	Deferred (Citywide)	Average Condition (Citywide)
2013-14	∞	$24,093,454	$0	92
2014-15	∞	$393,145	$0	89
2015-16	∞	$27,851	$0	84
2016-17	∞	$124,971	$0	79
2017-18	∞	$198,447	$0	74
2018-19	∞	$4,722,877	$0	83
6-Year Total		**$29,560,746**		
6-Year Avg.		**$1,093,458**		

Zero Funding - If the City spent no money over the next 6 years on pavement maintenance needs, the amount of deferred maintenance (or "backlog") citywide will increase from $24 million to $62 million and the citywide average pavement condition index will decrease from 62 to 35.

FY	Budget	Work Program	Deferred (Citywide)	Average Condition (Citywide)
2013-14	∞	$0	$24,093,454	62
2014-15	∞	$0	$26,744,765	55
2015-16	∞	$0	$30,415,740	50
2016-17	∞	$0	$43,928,684	45
2017-18	∞	$0	$52,024,113	40
2018-19	∞	$0	$62,450,915	35
6-Year Total		**$0**		

Current Funding – At the City's current expected pavement maintenance budget over the next 6 years of approximately $1 million annually, the amount of deferred maintenance citywide will increase from $23 million to $39 million and the citywide average pavement condition index will decrease from 64 to 50.

FY	Budget	Work Program	Deferred (Citywide)	Average Condition (Citywide)
2013-14	$999,674	$999,674	$23,093,780	64
2014-15	$999,388	$999,388	$24,550,369	63
2015-16	$995,611	$995,611	$26,544,780	59
2016-17	$995,540	$995,540	$28,759,921	55
2017-18	$998,841	$998,841	$32,018,607	51
2018-19	$997,444	$997,444	$38,670,215	50
6-Year Total		**$5,986,499**		
6-Year Avg.		**$997,365**		

Alternative Funding – If the City spent $93 million over the next 20 years on pavement maintenance needs, the amount of deferred maintenance (or "backlog") citywide will increase from $19 million to $25 million and the citywide average pavement condition index will remain 70 by the 20th year.

FY	Budget	Work Program	Deferred (Citywide)	Average Condition (Citywide)
2013-14	$4,999,868	$4,999,868	$19,093,587	70
2014-15	$4,997,549	$4,997,549	$16,378,178	71
2015-16	$4,998,986	$4,998,986	$13,928,117	72
2016-17	$4,998,991	$4,998,991	$11,649,359	72
2017-18	$4,997,052	$4,997,052	$8,128,931	72
2018-19	$4,998,695	$4,998,695	$7,233,436	77
2019-20	$4,996,389	$4,996,389	$3,322,599	78
2020-21	$3,886,787	$3,886,787	$0	77
2021-22	$418,960	$418,960	$0	73
2022-23	$4,999,863	$4,999,863	$8,622,146	73
2023-24	$4,992,273	$4,992,273	$9,475,014	74
2024-25	$4,995,078	$4,995,078	$6,803,917	75
2026-27	$4,989,404	$4,989,404	$2,954,214	76
2027-28	$3,528,529	$3,528,529	$0	74
2028-29	$4,793,913	$4,793,913	$0	74
2029-30	$4,995,959	$4,995,959	$12,345,981	74
2030-31	$4,983,470	$4,983,470	$15,667,242	73
2031-32	$4,983,923	$4,983,923	$21,302,943	72
2032-33	$4,993,634	$4,993,634	$22,515,947	70
2033-34	$4,997,141	$4,997,141	$25,431,146	70
20-Year Total		**$92,546,462**		
20-Year Avg.		**$4,607,716**		

Recommended Funding (Maintain Current Condition) – In order to maintain the citywide average PCI at or above 62 over the next 6 years, approximately $3 million per year will need to be budgeted.

FY	Budget	Work Program	Deferred (Citywide)	Average Condition (Citywide)
2013-14	$2,971,396	$2,971,396	$21,122,058	68
2014-15	$2,971,556	$2,971,556	$20,547,328	67
2015-16	$2,971,293	$2,971,293	$20,360,431	65
2016-17	$2,971,522	$2,971,522	$20,328,360	64
2017-18	$2,973,919	$2,973,919	$21,219,057	62
2018-19	$2,951,355	$2,951,355	$24,187,618	64
6-Year Total		**$17,811,042**		
6-Year Avg.		**$2,967,929**		

Recommended Funding (Reach PCI of 71) - In order to reach the average PCI at 71 on the first year of the program, the cost will be approximately $7.7 million.

FY	Budget	Work Program	Deferred (Citywide)	Average Condition (Citywide)
2013-14	$7,760,192	$7,760,192	$16,444,849	71

Recommended Funding (Reach PCI of 75) - In order to reach the average PCI at 75 on the first year of the program, the cost will be approximately $11.1 million.

FY	Budget	Work Program	Deferred (Citywide)	Average Condition (Citywide)
2013-14	$11,158,551	$11,158,551	$13,046,491	75

Recommended Funding (Reach PCI of 80) - In order to reach the average PCI at 80 on the first year of the program, the cost will be approximately $14.7 million.

FY	Budget	Work Program	Deferred (Citywide)	Average Condition (Citywide)
2013-14	$14,748,555	$14,748,555	$9,456,486	80

Recommended Funding (Reach PCI of 85) - In order to reach the average PCI at 85 on the first year of the program, the cost will be approximately $19.2 million.

FY	Budget	Work Program	Deferred (Citywide)	Average Condition (Citywide)
2013-14	$19,285,903	$19,285,903	$4,919,139	85

Recommended Funding (Reach PCI of 71) - In order to reach the average PCI at 71 on the 6th year of the program, the cost will be approximately $4.2 million per year, the amount of deferred maintenance citywide will decrease from $20 million to $14 million.

FY	Budget	Work Program	Deferred (Citywide)	Average Condition (Citywide)
2013-14	$4,262,534	$4,262,534	$19,942,507	67
2014-15	$4,261,940	$4,261,940	$18,125,829	68
2015-16	$4,259,940	$4,259,940	$16,547,123	68
2016-17	$4,261,192	$4,261,192	$15,055,756	68
2017-18	$4,258,862	$4,258,862	$12,706,714	67
2018-19	$4,251,940	$4,251,940	$14,130,732	71
6-Year Total		**$25,556,407**		
6-Year Avg.		**$4,258,775**		

Recommended Funding (Reach PCI of 75) - In order to reach the average PCI at 75 on the 6th year of the program, the cost will be approximately $5 million per year, the amount of deferred maintenance citywide will decrease from $20 million to $9 million.

FY	Budget	Work Program	Deferred (Citywide)	Average Condition (Citywide)
2013-14	$4,924,825	$4,924,825	$19,280,217	68
2014-15	$4,922,653	$4,922,653	$16,741,270	69
2015-16	$4,921,288	$4,921,288	$14,457,103	71
2016-17	$4,920,198	$4,920,198	$12,168,094	71
2017-18	$4,917,048	$4,917,048	$8,829,756	71
2018-19	$4,904,005	$4,904,005	$9,243,321	75
6-Year Total		**$29,510,015**		
6-Year Avg.		**$4,917,038**		

Recommended Funding (Reach PCI of 80) - In order to reach the average PCI at 80 on the 6th year of the program, the cost will be approximately $5.7 million per year, the amount of deferred maintenance citywide will decrease from $19 million to $3 million.

FY	Budget	Work Program	Deferred (Citywide)	Average Condition (Citywide)
2013-14	$5,677,803	$5,677,803	$18,527,239	69
2014-15	$5,677,252	$5,677,252	$15,162,571	71
2015-16	$5,680,574	$5,680,574	$12,072,882	74
2016-17	$5,680,003	$5,680,003	$8,263,694	74
2017-18	$5,666,336	$5,666,336	$4,054,056	75
2018-19	$5,669,812	$5,669,812	$2,609,693	80
6-Year Total		**$34,051,779**		
6-Year Avg.		**$5,674,795**		

Detailed descriptions of the information appearing on the following report are presented below:

Branch Name - The name of each pavement section appears in this column. Generally, the pavement section name is taken directly from a street sign; however, where no street signs are posted, the name appearing on the network map is noted instead.

From - A description of the beginning limit of each pavement section appears in this column. The limit will note the side of the boundary street from which the segment was taken (e.g., "N/S MAIN ST" refers to the north side of the intersection at Main St). If the beginning limit exists between intersections, then the beginning limit description may be an address, post mile marker, or a distance from a known point of reference (e.g., "500' N/O MAIN ST").

To - A description of the ending limit of each pavement section appears in this column. The description may consist of a street name, an address, or a distance from a known point of reference as described in the above section.

Section Area – The area of the pavement section.

Avg. Condition Before – The PCI prior to a maintenance treatment being applied.

Maintenance – The recommended treatment per the pavement management system.

- Major M&R < Critical – A treatment to be applied to a street that has a PCI less than the critical PCI.
- Major M&R >= Critical - A treatment to be applied to a street that has a PCI greater than or equal to the critical PCI.
- Slurry Seal – Application of a slurry seal, including preparation work such as dig-outs, crack sealing, pothole repair, etc.

Total – The total anticipated cost for maintenance, adjusted 3% per year for inflation.

Avg. Condition After – The estimated PCI after a maintenance treatment has been applied.
