Argument in favor of Measure TC

Vote YES on Measure TC - Keep Temple City safe and our roads well maintained.

Our city's roads are vital and irreplaceable public assets, facilitating businesses and emergency services in the safe and dependable transport of goods, equipment, and personnel, while providing safe and enjoyable travel for our families and friends, thus bolstering our economy and fostering a thriving community.

But year after year, our roads deteriorate faster than the city can afford to repair them while the cost of our current public safety services continue to rise.

The financial reality is clear, without a new and reliable source of funding, city streets will become more expensive to fix leading to severe decline over time and maintaining current public safety services will become very challenging.

Voting YES on Measure TC will ensure that this modest increase in sales tax stays in Temple City to support these crucial city services as it cannot be appropriated by the State or other agencies. The sales tax rate will align with those of our neighboring cities.

This approach distributes the responsibility for funding essential services equitably, extending it from solely residents to visitors who also depend on our roads and public safety services.

Measure TC ensures accountable and transparency with independent annual audits and spending disclosures.

Properly maintaining our roads is not optional. Delaying maintenance leads to rapid degradation, transforming minor cracks into unsustainable costly reconstruction. Investing wisely in our roads now conserves taxpayers' money, and well-kept streets create a more appealing and desirable community for businesses and homeowners.

Well-maintained roads are not a luxury but a necessity for the well-being of our residents.

Vote YES on Measure TC to ensure our roads are well-maintained for future generations, and keep our public safety services robust today and in the years to come.

Argument in favor of Measure TC

The undersigned author and proponents of the argument in favor of ballot measure (Measure TC) at the 2026 Temple City General Municipal Election to held in Temple City, California on March 3, 2026 hereby state the argument is true and correct to the best of their knowledge and belief.
